***Training Status Fortnightly Report 4th**

Student Name	K. Mohammed Abdulla Khan
--------------	--------------------------

Student Contact No.	9603670048
Student Email id	abdullaaa.alikhan.ak@gmail.com
Company Name	Hindupur Steel & Alloys (P) Ltd. (franchisee: Kamdhenu steel)
Project Title (if any)	Production & Operations Analysis
Reporting Manager	Mr. Pradip Kumbhakar (General Manager)
Contact No. of Reporting Manager	+91 9505681005
Email id of Reporting Manager	hindupursteelhup@gmail.com
Training Objective & Expected Deliverables	Training Objective: To equip the team with the skills to analyze manufacturing financial and operational data, track daily profitability, and create interactive Excel dashboards with embedded charts. Expected Deliverables: A fully functional Excel dashboard with profit analysis sheets, production efficiency charts, and operational cost breakdowns. Participants will also be able to identify loss-making days, calculate gross and net profit, and present key insights to management.

Status Update

Work done since Last two weeks & Current status	Week 7 and week 8: Over the past two weeks, we dug deep into the manufacturing unit's data and got a clear picture of how the plant is really performing. We found that overall, things are looking good—the plant made a gross profit of 2.85 crore and a net profit of 0.98 crore over five days, with healthy margins of 34.6% and 11.9% respectively. That said, one day stood out for the wrong reason: Day 3 saw a net loss of nearly 20 lakhs simply because sales volumes dropped sharply to just 95 tons. On the brighter side, we've now added proper charts right into the Excel sheets—so sales trends, material costs, production yields, and operational expenses are all visible at a glance. We also set up two new sheets to track profit and loss more clearly. Current Status: The dashboard is ready and working well. The plant is profitable overall, but that one weak day shows us we need to keep a close eye on daily sales volumes to avoid unexpected losses.
